

# Types of **Bad Bots**

## **Imposter Bots/ Impersonators**

Imposter bots are the most dangerous type of bots as they disguise themselves as legitimate visitors and can evade online security measures.

## **Click Bots**

Click bots can skew website analytics by fraudulent ad clicks, negatively impacting pay-per-click campaigns.

## **Download Bots**

Similar to click bots, download bots also manipulate engagement data by artificially inflating download counts.

## **Scraper Bots**

Scraper bots undermine the efforts of copyright bots by stealing website content and using it elsewhere.

## **Spy Bots**

Spy bots extract information about individuals and businesses by harvesting data from websites, newsgroups, chat-room conversations, and various other sources.
